

DEEMA ALOTHMAN

FullStack Developer

Aleppo, Syria | 0954250869 | deemaalothmann@gmail.com

SUMMARY

Laravel, Nest.js, and Node.js Developer, motivated and detail-oriented, with 2 year of experience in developing and maintaining dynamic web applications. Proficient in using the Laravel, Nest.js, and Node.js MVC frameworks to build efficient and scalable solutions. Skilled in MySQL database management, API development, and front-end technologies such as HTML and CSS. Eager to apply problem-solving skills and technical expertise to deliver secure, responsive, and user-focused applications. Dedicated to continuous learning and staying up to date with the latest trends in web development.

Technical Skills

- PHP & Laravel Framework
- Node.js, NestJS & JavaScript
- RESTful API Development
- MySQL Database Management (pgAdmin , XAMPP)
- HTML, CSS
- Proficiency In Microsoft Office Suite (Word, Excel, PowerPoint)

Professional Experience

- Laravel & Node.js & NestJS Developer
- AnyCode – Aleppo
- (2024-2025)
- Worked on developing backend systems for both mobile applications and web platforms using Node.js and NestJS, focusing on building efficient solutions and user-centered designs.

PROJECTS

- Student Affairs Automation System :

Developed an educational management system to handle students, departments, subjects, exams, and results in an academic institution.

Supports three main roles with dedicated interfaces: Admin (manage departments, subjects, instructors, generate performance reports, and automate student promotion), Instructor (manage assigned subjects, create and edit automated multiple-choice questions), Student (view subjects, take exams, and track results and promotion status).

Designed with organized databases (users, subjects, departments, questions, exams, results) and user-friendly interfaces for efficient academic management.

- Mosques Guide Mobile App – Aleppo :

Developed a mobile application providing a comprehensive guide to mosques in Aleppo, enabling users to access information such as location, prayer times, available services, and religious events.

Features include searchable mosque listings, interactive map with GPS navigation, detailed mosque information, user ratings, and direct communication with mosque management via WhatsApp.

Built with Flutter for cross-platform mobile support and Node.js + MySQL for backend and database management, integrated with Google Maps API for accurate location services.

- Medical Resources Management System:

Developed a full-stack management system to handle medical resources, including agents, clients, materials, categories, orders, and notifications.

Implemented a structured relational database using MySQL with Prisma ORM, ensuring clear relationships between agents, clients, materials, categories, orders, and detailed order items. Features include managing materials and their categories, tracking stock and remaining quantities, handling client orders with detailed items and pricing, and sending notifications to agents and clients.

Designed for efficient resource tracking, inventory management, and streamlined communication between staff and clients.

- Invoice Management System:

Developed an invoice management system to efficiently record, track, and organize invoices within an organization.

Features include linking invoices to products and departments, tracking payment status (paid, unpaid, partial), applying taxes and discounts, and enforcing role-based access control (User, Accountant, Admin).

Ensures data integrity by restricting deletion of departments or products if they are linked to invoices.

Designed with a structured database for users, sections, products, and invoices, providing a streamlined workflow for financial operations and reporting.

Traveler: Travel Booking & Tourism Platform:

Developed a comprehensive travel platform using Laravel to facilitate flight and hotel bookings, organize trips, and provide detailed information about tourist destinations.

Features include user registration and login, interactive booking interface for flights and hotels, destination guides with activities and user reviews, content management for administrators, and a customer support ticket system.

Built with Laravel for backend, HTML/CSS/JavaScript for frontend, MySQL for database management, and Bootstrap for responsive and attractive UI design.

Designed to enhance user experience with an easy-to-use interface and continuous support for travelers.

Education

- Bachelor's Degree in Computer Engineering University of Aleppo (September 2023 – August 2024)

- Graduated With a GPA of 83.4%

Additional Information

- Languages: Arabic (Native), English
- Training Courses: TOT (Training of Trainers)
